1000+ Users	\$177.00	\$29.50

Upgrade a Perpetual License

BASIS offers no-cost product license upgrades through the [SAM Plan](#) for customers who purchase this software and support maintenance coverage for their older BASIS licenses.

To upgrade a BASIS Product License that does not have SAM coverage:

- Purchase the SAM Plan retroactively from the original date of purchase through today plus one year
- If this license previously had SAM Plan coverage that is now lapsed, pay the non-discountable reinstatement fee based on a percentage of the list price of a new license
- The upgrade includes one year of the SAM Plan which also entitles the license to free upgrades for a year from purchase date
- In all situations, the customer will always receive a discount from the list price of a new license - 90% of base price (list price less SAM)

The license upgrade includes the new perpetual license format which automatically performs a monthly failover and recovery. The perpetual license allows for the changing of host IDs without having to contact your BASIS representative to purchase a license reset. License resets are no longer required. A restart of the BLM is all that is needed and a new license is retrieved with the new HostID. Moving to a brand new machine? Simply register from the new machine for a new license via the "Register and install a license automatically" option and remove the license from the old machine. Read more about the benefits of the perpetual, self-healing license [HERE](#).

Upgrade from Another Business BASIC

Competitive upgrades are priced at 90% of base price (list price less SAM). As with other BASIS Product purchases, one year of SAM Plan software and support maintenance is required. For more information on converting your application to BASIS technology, visit [conversion utilities](#).

Upgrade Pricing

Number of Users	Upgrade from Earlier BASIS Products or Other Business BASICS
BASIS Extended Edition (BBj, PRO/5, and Visual PRO/5)
