51-999 Users	\$201.00	\$33.50
1000+ Users	\$186.00	\$31.00

## Upgrade a Perpetual License

BASIS offers no-cost product license upgrades through the [SAM Plan](#) for customers who purchase this software and support maintenance coverage for their older BASIS licenses.

To upgrade a BASIS Product License that does not have SAM coverage:

- Purchase the SAM Plan retroactively from the original date of purchase through today plus one year
- If this license previously had SAM Plan coverage that is now lapsed, pay the non-discountable reinstatement fee based on a percentage of the list price of a new license

- The upgrade includes one year of the SAM Plan which also entitles the license to free upgrades for a year from purchase date
- In all situations, the customer will always receive a discount from the list price of a new license - 90% of base price (list price less SAM)

The license upgrade includes the new perpetual license format which automatically performs a monthly failover and recovery. The perpetual license allows for the changing of host IDs without having to contact your BASIS representative to purchase a license reset. License rests are no longer required. A restart of the BASIS License Manager or BASIS License Service is all that is needed and a new license is retrieved with the new HostID. Moving to a brand new machine? Simply register from the new machine for a new license via the “Register and install a license automatically” option and remove the license from the old machine. Read more about the benefits of the perpetual, self-healing license [HERE](#).

**From Another Business BASIC**

Competitive upgrades are priced at 90% of base price (list price less SAM). As with other BASIS Product purchases, one year of SAM Plan software and support maintenance is required. For more information on converting your application to BASIS technology, visit [conversion utilities](#).

**Upgrade Pricing**

Number of Users	Upgrade from Earlier BASIS Products or Other Business BASICS
<b>BASIS Extended Edition (BBj, PRO/5 and Visual PRO/5)</b>	
1-10 Users	\$335.50
11-25 Users	\$308.00
26-50 Users	\$286.00
51-999 Users	\$261.25
1000+ Users	\$242.00

# Conversion of a SaaS (Annual Subscription) to Perpetual License

Convert an existing SaaS (Annual Subscription) license to become a Perpetual license.

Subscription Period	Discount	SAM Plan
<b>Conversion of SaaS (Subscription) to a Perpetual License</b> <b>Discounts apply to New License product prices less SAM</b>		
24-36 Months	20%	<i>Added</i>
37-48 Months	30%	<i>Added</i>
49-60 Months	40%	<i>Added</i>
61+ Months	50%	<i>Added</i>

## Application Feature Line (AFL) Licensing

The AFL licensing option allows BASIS partners to have piracy protection under the BASIS licensing umbrella. It also allows BASIS partners to charge for their application software by user and by module. The cost of enabling this optional functionality is a 4% revenue share to BASIS of the BASIS partner's product revenues enabled and protected by a unique partner feature line in the BASIS license file.

Details are found in the Addendum to the Software License Agreement [HERE](#).
